

Delta Esparza

I am running for Mayor of Poway. I am a Software Engineering Manager for a local Defense company. For 18 years, I have managed and worked on complex products used to serve and protect our military as well as our country. I lived in Poway for 3 years and in the surrounding area for 13 years. I moved to Poway for its "small town country" feel, hiking trails, and tight knit community. Poway is a great town, but there is room for improvement. I will ensure development does not run rampant; it should be mindful to the needs of the community and consciously allow for the preservation of rural spaces. I will support affordable housing initiatives and work to protect the community's quality of life. I will serve Powegians and small/large businesses by representing and addressing their concerns as well as issues.

Come November you have a choice between two different paths, two different visions for Poway's future. This election is about you. Are you going to keep the status quo or vote for change?

It would be an honor to have your vote.

If you would like to donate or chat, you can contact me at delta.e@gmail.com.
