

PETER DE HOFF
Occupation: Scientist

My family moved here 13 years ago for probably the same reasons as you: Poway is safe, family-friendly, has great schools, open spaces, plenty of local amenities, and a balanced budget.

I will keep it that way.

I believe in Poway's General Plan and its dedication to family-friendly neighborhoods, open space and trails. I strongly oppose high density development.

I am endorsed by the entire Poway City Council and will continue Poway's tradition of responsible, stable governance. I will prioritize funding for Public Safety, control our water rates, work to improve our parks and amenities, support youth sports whenever possible, and improve the level of service we provide to Poway's seniors.

I will keep the City laser focused on its core mission and will encourage resilient cost saving improvements, such as solar energy installations and contracting out activities that have appropriate returns on investment.

I have served as the Vice-Chair of the Poway Budget Review Committee and have been active with the PAWS fathers volunteer group at Tierra Bonita Elementary School.

I am a Scientist at UCSD, having helped set up and operate UCSD's response to the COVID19 pandemic.
